To Whom It May Concern:

I want to share with you an observation I have made this past summer concerning students who have attended your ATLAS program.

In the summer we get a lot of applications from students wanting a summer position in our store. We get a wide variety of personalities and abilities of these young people. For a lot of them this is their first job.

I have had a few apply that have stood out with their mature, confident and well spoken nature. What they had in common on their resumes was the ATLAS program.

I have hired a couple of these students and have been very impressed with their work habits and confidence speaking with customers. I believe your program fosters the individual and gives them the interpersonal skills to succeed in life, not only in outdoor pursuits.

Sincerely,

Jill Winters
